Summary

AI/ML Engineer focused on large language model (LLM) fine-tuning, NLP, and efficient deep learning systems. Experience in building and evaluating transformer-based models under resource constraints. Co-author of multiple peer-reviewed papers in LoRA-based fine-tuning and human-aligned AI. Interested in developing scalable, reliable AI systems for real-world applications.

Education

Daffodil International University,
B.Sc. in Electrical and Electronic Engineering

June 2026

Skills

Programming	Python, C++, MATLAB
Research Tools	Transformers, PEFT, Scikit-learn
Research Tools	Google Colab, Jupyter Notebook
Development	VS Code, GitHub, Git
Hardware	Arduino, ESP32, ESP8266

Selected Projects

Enhancing Genre Fidelity in Children's Story Generation via Fine-Tuned LLMs

- Designed a genre-conditioned story generation framework using LLaMA-2 (7B) fine-tuned with PEFT-LoRA.
- Evaluated genre adherence using a transformer-based classifier achieving 97.56% accuracy.
- Tools: Python, HuggingFace Transformers, Scikit-learn, Google Colab

IoT-Based AI-Controlled Smart EV Charging and Protection System

- Developed an intelligent EV charging and protection framework with real-time monitoring and fault detection.
- Implemented over-voltage and over-current protection using sensor-driven control logic.
- Tools: ESP32, Arduino, C++, IoT platforms

Smart Agriculture System

- Built an IoT-based system for remote monitoring of soil moisture and environmental conditions.
- Tools: ESP8266, Blynk, C++

Magnetic Levitation System

- Implemented a closed-loop electromagnetic levitation prototype using sensor feedback.
- Tools: Analog and digital hardware

Publications

Chawdhury**, "Enhancing Emotion Classification with Interpretability Using LoRA-Finetuned LLaMA-3.2-3B," *Accepted at the 11th IEEE International Women in Engineering Conference on Electrical and Computer Engineering (WIECON-ECE 2025)*, Cox's Bazar, Bangladesh, December 21–22, 2025.
- S. Pramanik, A. Chawdhury, P. Biswas, S. Bhattacharjee**, "Enhancing Genre Fidelity in Children's Story Generation via Fine-Tuned LLMs," *Proceedings of the International Conference on Quantum Photonics, Artificial Intelligence, and Networking (QPAIN 2025)*, Rangpur, Bangladesh.

Leadership & Professional Involvement

Student Advisor, IEEE Industry Applications Society (IAS) DIU Student Branch Chapter 2026

- Guided student members in technical and professional development activities within the IAS chapter.
- Supported organization of workshops, seminars, and collaborative initiatives focused on industry-relevant skills.

Speaker, Seminar on “Write to Publish – Research Paper and LaTeX Mastery” April 2026

- Delivered a technical seminar on academic writing, research publication strategies, and LaTeX usage.
- Mentored participants on structuring research papers and improving publication readiness.

Achievements

- **Top 2% Paper**, ICCIT 2025
- 1st Runners-Up, DIU Division of Research Poster Presentation 2025
- ICAI Campus Ambassador — Bangladesh (2025)
